

# Suction Hose Test Kit

---

Part No. SHTK-Pump

Finally, a simple way to test all types of suction hoses used in fighting fire according to NFPA standards in one convenient kit!  
Works for conventional hard rubber and PVC!

## FEATURES:

---

THE SUCTION HOSE TEST KIT CONSISTS OF:

- Vacuum pump
- 6 Lexan Male gasket plugs (to create the vacuum)
- 6 Lexan quick attachable Female / vacuum ends  
Lexan pieces fit: 6", 5", 4 1/2", 4", 3" and 2 1/2" hose coupling
- Flash light
- Plastic carrying case for easy transport and storage
  
- Allows NFPA 1962 A.7.5 compliant testing
- Simple, quick, and easy to use
- Highly portable
- Smart Lexan disk design - no threads or fastening agents added, needed or required!
- Accommodates all connection types

## OPERATION:

---

- Simply place the appropriately sized Lexan disks over the female and male connections when you start the pump.
- Watching the gauge, isolate the system with a quarter turn of the valve once the desired level of vacuum is achieved and shut off the pump.
- While the vacuum holds each disk in place, the clear Lexan gives you the ability to visually inspect inside of the hose with the flashlight for de-lamination or other damage.
- When time is up, return to atmosphere with another quick turn of the valve and you are done!
