

Bunker and Floating Strainers

Bunker Strainer - IRBL254

Bunker Strainer - IRBL156

Floating Strainer - FS15

- ***Bunker Strainer - IRBL254*** - A low level strainer converted to be used in the removal of water from bunkers or low lying flood areas on Golf Courses or Sports fields, it provides maximum draw down depth with its unique design and anti-contamination tray for protection of your pump. Made of powder coated aluminum the, "Bunker Strainer" comes standard with a 2-1/2" "Cam-lock Connection" to be sized for most trash pumps.
- ***Bunker Strainer - IRBL156*** - The "Bunker Strainer 1-1/2" Swivel Fitting" can be adapted to fit sizes as small as 1" and up to 2", making it adaptable to all smaller water pumps for bunker drainage. Please specify size when ordering so that the proper fitting can be added.
- ***Floating Strainer - FS15*** - Our "Self-leveling Floating Strainer" designed to be used with your suction pump; will efficiently pull water from a stream or pond surface without the suction line and/or device hitting bottom and collecting debris. Used for filling tanks of all types or with irrigation pumps, Kocheck's "Floating Strainer" is one of a diverse line of suction products that we offer. Our floating strainers come complete with a "Full Time Swivel" to allow for constant self-leveling, along with a "Check Valve" and "Strainer Screen" for maximum performance and a clean discharge of water.
