

SHOKRAY BLU

Multi-Purpose
Cleansing Pellet

Cleanses and
Eliminates odors!!

- **SHOKRAY BLU** is a complete cleansing solution for use with artificial turf and **MORE** to clean and deodorize. A unique ionic action from the pellet forms a blanket of long lasting protection and controls odor caused by bacteria and microorganisms on surface areas. Its benefits are enhanced by being suspended in Kocheck's "Big Water" surfactant allowing one to achieve a deep cleansing penetration needed on sportsturf and other surfaces. Another advantage is it's effectiveness as a stadium washdown agent, cleansing seating and other public areas. One pellet in Kocheck's applicator will dissolve in approximately 1000 gallons of water at 70 to 90 PSI. Mixed with water will alleviate static cling of artificial turf fibers. These results will vary with water temperature, flow rates and changes in water quality. Simply rinse the area thoroughly after an application.
- Sold as a case of 12 (IRBWPS-PD5) or individually (IRBWPS-PD6), designed to be used with our Applicators: **Standard Pellet Applicator System** IRBWPS-AD1 or the **Deluxe Pellet Applicator System** IRBWPS-AD2.

SUGGESTED AREAS:

-Artificial Turf -Bleacher Seats -Dugouts -Locker Rooms/Bathrooms -Tournament Gallery Areas -Clipping dumps
 -Tents/Awnings: on and beneath -Furniture -Wooden Bridges -Snack Bar Areas -Maintenance Storage
