

Tournament Nozzle

■ Tournament Nozzle NZ031

Kochek's "Tournament Nozzle" provides full flow cooling at 3 GPM. The hydration created by a constant fine uniform mist replenishes while cooling the turf for pre tournament or heat stress situations **without** over watering. Protect the hard work you have invested and maintain the quality of your turf.

- The "Tournament Nozzle" comes complete with a 1" NPSH or a 3/4" GHT connection and Kochek's own "Brass Shutoff Valve" providing flow control at your finger tips.
- Made of aluminum and brass components, powder coated for maximum durability.
